## 1 Introduction

Hello! herer

Formula:-  $(a + b)^2 = a^2 + b^2 + 2ab$

And the equatino of Energy is

$$E = MC^2$$

The formul is derivied By Albert

$$a_0, a_1, a_2 \dots, a_{100}$$

Greek Letters

$$\pi$$

$$\alpha$$

Area of circle is  $Area = \pi r^2$

Trigo Function:-

$$\sin \theta = p/h$$

$$\cos \theta = b/h$$

$$\tan \theta = \sin \theta / \cos \theta$$

Log Function

$$y = \log x$$

$$y = \log_5 x$$

Square roots

$$\sqrt{2}$$

$$\sqrt[3]{2}$$

Fractions

$$\frac{25}{5}$$

About  $\frac{2}{3}$  of the glass is full.

About  $\frac{2}{3}$  of the glass is full.

About  $\frac{2}{3}$  of the glass is full.

About  $\frac{2}{3}$  of the glass is full.

$$\frac{\sqrt{x+1}}{\sqrt{x-1}}$$

$$3\left(\frac{1}{x^2-1}\right)$$

$$3(\frac{1}{x^2-1})$$

Table:

$x$	1	2	3	4
$f(x)$	10	20	30	40

Table 1: These are tale to ploat on a graph

$x$	1	2	3	4
$f(x)$	10	20	30	40

Table 2: These are tale to ploat on a graph

$x$	1	2	3	4
$f(x)$	10	20	30	40

Table 3: These are tale to ploat on a graph

$x$	1	2	3	4
$f(x)$	10	20	30	40

Table 4: These are tale to ploat on a graph
